EEV 109973

Crown Triton™ Series Motors

TEFC : Cast Iron Frame

- Premium Efficiency
- Meets or Exceeds EISA 2007 Requirements Defined in NEMA MG1 Table 12-12 as NEMA Premium™
- 3 Year Warranty

HYUNDAI
HEAVY INDUSTRIES CO.,LTD.

Experience Combined with Technology

Hyundai Induction Motors use Finite Element Analysis (FEA) and Computer Aided Design (CAD) methods to develop and produce the most innovative motors from state-of-the-art and fully automated manufacturing facilities.

Hyundai's Crown Triton™ cast iron frames greatly improve motor performance by maximizing heat dissipation.

The use of advanced technology to design and manufacture electric motors results in a reasonably priced top quality motor with superior performance characteristics.

EEV 109973

CC 038A

Approvals : CSA C US, EEV mark, CE, Class I Division 2 (CSA only), C-UL

ee CC 038A CSA E EEV 109973

Crown Triton™ Series - Premium Efficiency Motors

Product Range

- Frame size : 143T to 449TZ
- Horsepower : 1 HP to 250 HP
- Poles : 2, 4, 6 pole
- Enclosure : TEFC, rigid cast iron construction

Typical Features & Construction

- AC 3 phase, squirrel cage induction motor
- Totally Enclosed Fan Cooled
- Premium efficiency meets or exceeds EISA 2007 requirements, as defined in NEMA MG1 table 12-12, NEMA premium™
- NEMA design B torque
- NEMA MG.1, EEMAC M1-6, CSA C390
- 60 Hz, 208-230/460 V and 575 V (Single voltage only for 150 HP & above)
- Class F insulation with Class B temperature rise
- Dual rated service factors 1.15 at 40˚C ambient and 1.0 at 65˚C ambient
- Continuous duty
- Supply voltage ±10%, frequency ±5%
- Wye-delta start capability from 15 HP (254T) to 250 HP (449T)
- Star internal connection for 575 V motors
- Part winding start capability at low voltage from 1 HP to 125 HP
- Inverter ready for 10:1 CT and 20:1 VT (NEMA MGI. Part 30)
- Bidirectional rotation
- Quiet running : Minimizing noise and vibration
- Low temperature bearing grease (Mobil polyrex EM grease) allows ambient temperature from -35˚C to +50˚C
- Altitude below 3,300 feet (1,000 meters)
- Rigid cast iron construction
- F-1 mounting (F-2 field modifiable)
- Oversized gasketed conduit box
- Oversized vacuum degassed bearings
- Corrosion resistant zinc plated hardware
- Corrosion resistant polyurethane paint
- Drive end shaft slinger or V-ring
- Stainless steel name plate
- Low temperature rise design will allow rating above 40˚C ambient and altitudes above 3,300 feet at 1.0 service factor
- Fully tested and documented per IEEE Std. 112, method B and CSA C390
- EEV mark and CC No. on nameplate
- CSA for Class Ⅰ, Division 2, Group A, B, C, D, temperature code T3 available
- C-face and D-flange kits available

Frames 143T-286T

Frames 324T-326T

Frames 364T-449TZ

Use of Improved and Optimized Materials to Achieve Better Features & Performance

- High grade, low loss, insulated electro-magnetic steel laminations are punched and core loss is controlled for maximum efficiency.
- Heavy enamel coated copper windings with precise winding process ensure consistent motor performance and extended insulation life.
- Superior Class F non-hygroscopic insulation system, multidipped and baked with Class H insulation varnish.
- Clearly numbered leads make connection easy.
- Die cast rotor of high conductivity aluminum eliminates variations in bar & end ring resistance. This assures consistent motor performance.
- Dynamically balanced rotor with half key ensures smooth operation, exceeding standard NEMA vibration requirements.
- Rotor surface is coated with corrosion resistant paint for outstanding resistance to severe environments.
- Drive end shaft slinger or V-ring protects bearing system against contaminants.
- Oversized gasketed conduit box exceeding CSA, NEMA & NEC minimum volumes is diagonally split and fully rotatable at 90° increments.
- Non-sparking, corrosion resistant external polypropylene fan assures maximum cooling and quieter operation.
- Removable plastic drain plugs to allow condensation to drain from the motor.
- Corrosion resistant polyurethane paint and corrosion resistant zinc plated hardware protect motors against severe environments.

Optional Features

- Cast iron fan guards
- Special voltages
- Two speed motors
- Special shaft designs and materials
- Space heaters
- Encoders
- Rotating labyrinth seal (ProTech™)
- Auxiliary conduit boxes
- Drip canopies for vertical applications
- Thermistors
- Thermostats
- Constant speed blowers

CC 038A

TEFC, Crown Triton™ Series - Premium Efficiency Motors

- Cast iron construction
- Meets or exceeds EISA2007 requirements
- Class F insulation with Class B temp. rise, 1.15 S.F.
- Diagonally split, gasketed conduit box, fully rotatable at 90° increments
- C-face and D-flange kits available
